

Dear Sir or Madam,

My love of computers began at age 11 when my family got its first PC. Shortly after I began programming with Visual Basic. From there I moved on to other languages and began learning System Administration as well. When it comes to computers, I never want to stop learning new things. This trend has held true for over a quarter century now. In addition I have years of customer service experience and truly understand the importance of delivering a quality product. I recently graduated with a B.S. in Computer Science and relocated to Chicago, IL.

I am excited about any Software Developer positions that American Eagle might have. I friend told me this company is in need of entry-level web developers, which is also up my alley. I believe that my sheer passion for computers in combination with years of office and management experience – always with a customer focus – makes me an ideal candidate for any such positions. Thank you for your consideration and would be open to discuss other positions as well.

Sincerely,

Jason Brunelle
