

Dear Sir or Madam,

My love of computers began at age 11 when my family got its first PC. Shortly after I began programming with Visual Basic. From there I moved on to other languages and began learning System Administration as well. When it comes to computers, I never want to stop learning new things. This trend has held true for over a quarter century now. In addition I have years of customer service experience and truly understand the importance of delivering a quality product. I recently graduated with a B.S. in Computer Science and relocated to Chicago, IL.

I am excited about the Associate Software Quality Assurance Engineer position that Scientific Games recently published on Indeed. I believe that my sheer passion for computers including knowledge of Linux and Visual Studio as well as previous quality assurance experience in combination with years of office and management experience – always with a customer focus – makes me an ideal candidate for the Associate Software Quality Assurance Engineer position. Thank you for your consideration and would be open to discuss other positions as well.

Sincerely,

Jason Brunelle
