

Dear Sir or Madam,

A friend of mine in Houston, TX recently utilized G2's services to decide on and use Zoho Desk software. His positive experience throughout the whole thing has kept this company on my radar. I also recently attended a Built In Chicago event at their location.

My love of computers began at age 11 when my family got its first PC. Shortly after I began programming with Visual Basic. From there I moved on to other languages and began learning System Administration as well. When it comes to computers, I never want to stop learning new things. This trend has held true for over a quarter century now. In my day-to-day life every time I have an obstacle to overcome my first thought is "how can I use computers to solve this problem." I recently graduated with a B.S. in Computer Science and relocated to Chicago, IL.

I am excited about the Jr Front End Web Developer position that G2 recently published on Built In Chicago.

I believe that my sheer passion for computers in combination with years of office and management experience – always with a customer focus – makes me an ideal candidate for the Jr Front End Web Developer position. Thank you for your consideration and would be open to discuss other positions as well.

Sincerely,

Jason Brunelle
