

Dear Sir or Madam,

My love of computers began at age 11 when my family got its first PC. I was introduced to Linux 7 years later and have tinkered with it on and off ever since. Indeed sometimes I go weeks without booting back into Windows. When it comes to computers, I never want to stop learning new things. This trend has held true for over a quarter century now. In addition I have years of customer service experience and truly understand the importance of delivering a quality product. I recently graduated with a B.S. in Computer Science and relocated to Chicago, IL.

I am excited about the Junior Linux Sysadmin position that Hudson River Trading recently published on Built In Chicago. I believe that my sheer passion for computers including building and maintaining server equipment and scripting tasks in combination with years of office and management experience – always with a customer focus – makes me an ideal candidate for the Junior Linux Sysadmin position. Thank you for your consideration and would be open to discuss other positions as well.

Sincerely,

Jason Brunelle
